DETAILED ACTION

Restriction Requirement

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-21 and 28-39, drawn to Interexchange signalling, classified in Class 379, subclass 229.

Group II. Claims 22-27, drawn to Fraud detection or control, classified in Class 379, subclass 114.14.

Group III. Claim 40, drawn to Centralized switching system, classified in Class 379, subclass 242.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I. Claims 1-21 and 28-39, Group II. Claims 22-27 and Group III. Claim 40 are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In this instant case, invention Group I has separate utility such as for use in correlation information, whereas invention Group II has separate utility such as for use in determining identifiers from billing parameters as well as invention Group III has separate utility such as for use in upgrading a switch. See M.P.E.P. § 806.05(d).

3. Because these inventions are distinct for the reason given above and the search required for Group I is not required for Group II as well as Group III, restriction for examination purposes as indicated proper.

4. During a telephone conversation with Mr. Gregory L. Maurer on 11/18/05 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-21 and 28-39. Claims 22-27 and 40 are withdrawn from further consideration by the Examiner, 37 C.F.R. §

1.142(b), as being drawn to a non-elected invention. However, Mr. Gregory L. Maurer agreed to cancel the non-elected claims (i.e., claims 22-27 & 40) on the second telephone interview on 11/21/05.

EXAMINER'S AMENDMENT

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Gregory L. Maurer on 11/21/05.

The application has been amended as follows:

Claims 22-27 and 40 were deleted.

Reasons for Allowance

6. The following is an examiner's statement of reasons for allowance:

Claims 1-21 and 28-39 are allowed.

Regarding claims 1, 21, 28, 32, 33, 34, 35 and 38, references, Bunting (US Patent No. 6,393,289), Patel (US Patent No. 5,884,179) and Examiner's newly discovered references Bertacchi (US Patent No. 5,790,638) and Suzuki (US Patent No. 5,018,194) fail to teach storing correlation information in a first switch and employing the correlation information to correlate an outgoing call leg from the first switch to an incoming call leg from a second switch to the first switch.

Art Unit: 2645

Examiner's newly discovered reference, Taff (US Patent No. 6,845,152) broadly teaches the claimed invention. However, Taff is not a prior art reference.

Any comments considered necessary by applicant must be submitted no later than the payment the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Md S. Elahee whose telephone number is (571) 272-7536. The examiner can normally be reached on Mon to Fri from 8:30am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Fan Tsang can be reached on (571) 272-7547. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
